

**NICHE MARKETS AND STRATEGIES FOR SMALL/MID-SIZE SEMICONDUCTOR
EQUIPMENT COMPANIES**

Table of Contents

Chapter 1	Introduction	1-1
Chapter 2	Niche Markets for PROCESSES for 300mm Wafers	2-1
2.1	Introduction	2-1
2.2	Wafer Level Processing (WLP)	2-3
2.2.1	Introduction	2-3
2.2.2	Flip Chip/WLP Processing Issues and Trends	2-4
o	Wafer Bumping	2-4
o	Wafer Level Packaging	2-8
o	Pad Redistribution	2-12
o	Wafer Bumping Costs	2-18
2.2.3	Lithography Issues And Trends	2-20
2.2.4	UBM Etch Issues And Trends	2-21
2.2.5	Metallization Issues and Trends	2-25
o	Gold Bumping Metallization	2-25
o	Solder Bumping Metallization	2-27
2.2.6	Analysis of WLP Market	2-29
2.3	3-D TSV	2-32
2.3.1	Insight Into Critical Issues	2-32
2.3.2	Cost Structure	2-33
2.3.3	Critical Processing Technologies	2-40
2.3.4	Evaluation Of Critical Development Segments	2-46
2.3.5	TSV Device Forecast	2-52
2.4	Non-volatile Memory Devices MRAM, RRAM and FeRAM	2-55
2.4.1	Processing Requirements for MRAMs	2-60
2.4.2	Processing Requirements for RRAMs	2-62
2.4.3	Processing Requirements for FeRAMs	2-65
2.4.4	Roadmap for Commercialization	2-67
2.5	Ultrathin Wafers	2-70

2.5.1	Applications for Ultrathin Wafers	2-70
2.5.2	Substrate Thinning	2-71
2.5.3	Backside Metallization Requirements	2-77
2.5.4	Surface Stress Relief	2-79
2.5.5	Ultrathin Wafer Market	2-81
Chapter 3	Niche Markets for EQUIPMENT for SUB 300mm Wafers	3-1
3.1	Introduction	3-1
3.2	MEMs	3-3
3.2.1	The MEMS Market Infrastructure	3-3
3.2.2	Forecast Of The Key Applications And Markets	3-4
o	MEMS Device Market Forecast	3-4
o	MEMS System Market Forecast	3-16
3.2.3	Markets for Equipment and Materials Suppliers	3-19
3.3	HB-LEDs	3-39
3.3.1	Recent Progress in High Brightness LED Technology and Applications	3-39
3.3.2	Processing Equipment	3-48
3.3.3	Materials of Construction	3-60
3.3.4	OLED Manufacturing	3-64
3.3.5	Outlook for the Worldwide OLED Market	3-67
3.3.6	Outlook for the Worldwide HB-LED Market	3-71
3.4	Compound Semiconductors	3-82
3.4.1	GaAs Devices	3-82
3.4.2	Equipment Trends	3-91
3.4.3	Wafer Sizes	3-103
3.4.4	GaAs IC Market Forecast	3-106
3.4.5	Competing Against SiGe	3-108
3.5	Thin Film Read/Write Heads for HDD	3-116
3.5.1	Trends in HDDs	3-116
3.5.2	Recording Head Market Forecast	3-125
3.5.3	Head Processing	3-128
3.5.4	Head Fabrication – CMP, Deposition, Lithography	3-133
3.5.5	CMP Challenges	3-138

3.5.6	Lithography Challenges	3-144
3.6	Bulk Acoustic Wave (BAW)	3-147
3.6.1	Basic Elements of the BAW Device	3-151
3.6.2	AlN Layer Quality Requirements	3-154
3.6.3	Equipment Requirements for BAW and FBAR Filtering Devices	3-158
3.6.4	Bulk Acoustic Wave (BAW) Market	3-159

List of Tables

2.1	Common UBM Stacks For Solder And Gold Bumping	2-5
2.2	Solder Bumping Guidelines	2-7
2.3	ITRS Pin Counts For Different Applications	2-9
2.4	Pillar-WLP CSP Guidelines	2-14
2.5	Pad Redistribution Guidelines	2-17
2.6	UBM Film Etchants	2-24
2.7	Common UBM Stacks For Gold And Solder Bumping	2-26
2.8	WLP Demand By Device (Units)	2-30
2.9	WLP Demand By Device (Wafers)	2-31
2.10	Forecast Of TSV Devices By Wafers	2-53
3.1	MEMS Device Markets	3-5
3.2	MEMS System Markets	3-18
3.3	MEMS Equipment Markets	3-20
3.4	Color, Wavelength Material Of LED	3-41
3.5	Comparison of LED, HB-LED, UHB-LED Characteristics	3-47
3.6	Epitaxy Metrics from Initial Solid-State Lighting Manufacturing R&D Roadmap	3-54
3.7	Process Control Metrics	3-56
3.8	Production Method for Various LEDs	3-61
3.9	GaAs IC Market Forecast	3-107
3.10	Comparison Of Piezoelectric Materials For BAW Applications	3-155

List of Figures

2.1	Solder Bumping Process	2-6
2.2	Pillar-WLPCSP Process	2-13

2.3	Pad Redistribution Process	2-16
2.4	Via First (iTSV) Cost Of Ownership	2-34
2.5	Via First (iTSV) Cost Of Ownership Front And Back Side	2-36
2.6	Via First (iTSV) Process Flow	2-37
2.7	iTSV Versus pTSV Cost Of Ownership	2-38
2.8	Effect Of TSV Depth And Diameter On Cost	2-39
2.9	Illustration Of Bosch Process	2-43
2.10	Process And Equipment Flow For EMC3D Consortium Members	2-47
2.11	Various TSV Integration Schemes	2-49
2.12	Forecast OF TSV Devices By Wafers	2-54
3.1	Operation of LED	3-40
3.2	Market drivers for LED Biz and Applications	3-44
3.3	SSL vs. Classical Technologies	3-45
3.4	LED Performance vs. Traditional Light Sources	3-46
3.5	Pareto Analysis Of SSL Manufacturing Costs	3-51
3.6	Nanoimprint Lithography System	3-59
3.7	Regular LED (white) Front-End Steps	3-62
3.8	Schematic of AMOLED	3-68
3.9	Active Matrix OLED Capacity and Demand Forecast	3-69
3.10	LED Market by Sector	3-80
3.11	Worldwide LED Market Forecast	3-81
3.12	Schematic of GaAs MESFET	3-83
3.13	Schematic of GaAs HEMT Device	3-85
3.14	Schematic of GaAs HBT Device	3-88
3.15	Schematic of GaAs HBT Device	3-90
3.16	pHEMT MMIC Process Flow Chart	3-92
3.17	0.15 Micron 3MI Process Cross Section	3-98
3.18	InGaP HBT Process	3-101
3.19	Worldwide SiGe Market Forecast	3-114
3.20	Hard Disk Drive Roadmap	3-117
3.21	Decrease In Average Price Of Storage	3-118
3.22	Heads Per Drive	3-120
3.23	Increase In Areal Density	3-122
3.24	Market Forecast Of Recording Head Consumption	3-126

3.25	Heads Per Drive Forecast	3-127
3.26	Thin Film Head Structure	3-129
3.27	Critical Features In Thin Film Head Structure	3-130
3.28	Spin Valve Head Structure	3-131
3.29	Cross-Sectional View TFH Stacks	3-134
3.30	Cross-Sectional View Of A TFH Design	3-135
3.31	CMP Slurry System For Tfh Wafer Polishing	3-142
3.32	Critical Feature Trends In Thin Film Heads	3-145
3.33	Application Space For Rf Filters	3-149
3.34	FBAR Diagram	3-152
3.35	BAW-SMR Diagram	3-153
3.36	RF Front-End Filters In Mobile Devices	3-160
