

Semiconductors for Alternative Energy Technologies: Opportunities and Markets		
	Table of Contents	
Chapter 1	Introduction	1-1
Chapter 2	Solar Energy	2-1
2.1	Solar Infrastructure	2-1
2.1.1	Current developments	2-2
2.1.2	Worldwide installed photovoltaic totals	2-9
2.1.3	Applications of PV	2-11
2.1.3.1	PV Power Stations	2-11
2.1.3.2	PV in Buildings	2-13
2.1.3.3	PV in Transport	2-15
2.1.3.4	PV in Standalone Devices	2-18
2.1.3.5	Rural Electrification	2-18
2.1.3.6	Solar Roadways	2-19
2.1.4	Economics of PV	2-19
2.1.4.1	Power Costs	2-19
2.1.4.2	Grid Parity	2-20
2.1.4.3	Financial Incentives	2-21
2.1.5	Solar Forecast	2-22
2.2	Semiconductor Technology	2-24
2.2.1	Inverter/Converter Devices	2-24
2.2.2	Inverter Analysis	2-28
2.2.3	Inverter Pricing	2-34
Chapter 3	Wind Energy	3-1

3.1	Wind Energy Infrastructure	3-1
3.1.1	Electricity Generation	3-2
3.1.1.1	Grid Management System	3-2
3.1.1.2	Capacity Factor	3-3
3.1.2	Turbine Placement	3-4
3.1.3	Offshore Wind Farms	3-4
3.1.4	Utilization Of Wind Power	3-9
3.1.5	Economics And Feasibility	3-16
3.1.5.1	Growth And Cost Trends	3-16
3.1.5.2	Theoretical Potential	3-20
3.1.5.3	Direct Costs	3-20
3.1.5.4	External Costs	3-21
3.1.5.5	Incentives	3-22
3.2	Semiconductor Technology	3-23
3.2.1	Key Component Semiconductor Devices	3-23
3.2.2	Semiconductor Analysis	3-25
Chapter 4	Fuel Cells	4-1
4.1	Fuel Cell Infrastructure	4-1
4.1.1	Fuel Cell Design	4-1
4.1.2	History	4-3
4.1.3	Types of fuel cells	4-4
4.1.3.1	Polymer Electrolyte Membrane	4-4
4.1.3.2	Phosphoric Acid	4-6
4.1.3.3	Direct Methanol	4-8
4.1.3.4	Alkaline	4-8

4.1.3.6	Molten Carbonate	4-10
4.1.3.7	Solid Oxide	4-12
4.1.3.8	Proton Exchange Fuel Cells	4-15
4.1.3.9	Regenerative (Reversible) Fuel Cells	4-20
4.1.4	Efficiency	4-20
4.1.4.1	Fuel cell efficiency	4-20
4.1.4.2	In practice	4-21
4.1.5	Fuel cell applications	4-23
4.1.5.1	Applications	4-24
4.1.5.2	Hydrogen Transportation And Refueling	4-28
4.1.6	Fuel Cell Manufacturers	4-34
4.2	Semiconductor Technology	4-46
4.2.1	Key Component Semiconductor Devices	4-46
Chapter 5	Storage/Electric Vehicle Technology	5-1
5.1	Storage/Electric Vehicle Infrastructure	5-1
5.1.1	Usage And Applications	5-2
5.1.2	Charging And Discharging	5-4
5.1.3	Active Components	5-6
5.1.3.1	Common Rechargeable Battery Types	5-9
5.1.3.2	Less Common Types	5-10
5.1.4	Recent Developments	5-11
5.1.5	Batteries for Electric Vehicles	5-13
5.1.5.1	NiMH Batteries	5-13
5.1.5.2	EV Li-Ion Rechargeable Batteries	5-17
5.1.6	Vehicle Charging	5-46
5.1.6.1	Grid Impacts	5-50

5.1.6.2	Communication	5-50
5.2	Forecasts	5-57
5.2.1	HEV/EV Forecast	5-57
5.2.2	Key Component Semiconductor Devices - HEV/EV	5-57
5.2.3	ADAS (Advanced Driver-Assistance Systems)	5-62
	LIST OF TABLES	
2.1	Total Photovoltaic Peak Power Capacity By Country	2-10
2.2	World's Largest Photovoltaic Power Plants	2-12
2.3	PV Inverter Market Distribution	2-32
2.4	Solar Inverter Market Analysis	2-35
3.1	Operational Offshore Wind Farms	3-7
3.2	Offshore Wind Farms Under Construction	3-8
3.3	Installed Windpower Capacity (MW)	3-10
3.4	Annual Wind Power Generation (TWh)	3-11
3.5	U.S. Installed Capacity (Megawatts)	3-13
4.1	Fuel Cell Comparisons	4-17
4.2	Fuel Cell Details	4-18
4.3	Worldwide Fuel Cell Shipments By Type	4-40
5.1	Rechargeable Battery Technologies	5-7
5.2	10-Year Costs For Electric Vehicle Batteries	5-15
5.3	Breakeven Costs For EV Batteries – 40 Mile Range	5-16
5.4	Breakeven Costs For EV Batteries – 100 Mile Range	5-18
5.5	Summary Table Of Future Batteries	5-45
5.6	Types Of Charging Stations	5-47
5.7	Typical Charging Times By Power Level And Electric Vehicle	5-49
5.8	Forecast Of Global Sales Of HEVs And EVs	5-58

5.9	BOM Cost Breakdown—Tesla Model 3, VW ID.3 and VW Golf	5-60
5.10	ADAS System Key IC Components And Suppliers	5-63
5.11	Automotive Semiconductor By Application	5-65
	LIST OF FIGURES	
2.1	Flat Plate Solar Collector	2-3
2.2	Parabolic Trough Solar Collector	2-4
2.3	Solar Dish/Engine Collector	2-5
2.4	Solar Power Tower Collector	2-6
2.5	Global Solar PV Module Forecast	2-23
3.1	Evolution Of U.S. Commercial Wind Technology	3-5
3.2	U.S. Installed Capacity (Megawatts)	3-14
3.3	Worldwide Wind Turbine Shipments	3-17
3.4	Wind Power As Percent Of Electricity	3-19
4.1	Polymer Electrolyte Membrane (PEM) Fuel Cell	4-5
4.2	Phosphoric Acid Fuel Cell (PAFC) Fuel Cell	4-7
4.3	Alkaline (AFC) Fuel Cell	4-9
4.4	Molten Carbonate (MCFC) Fuel Cell	4-11
4.5	Solid Oxide (SOFC) Fuel Cell	4-13
4.6	Proton Exchange Fuel Cell	4-16
4.7	Transition To A Hydrogen Economy	4-29
4.8	Hydrogen Reformer Fueling Station	4-32
4.9	Diversified Fuel Cell Development	4-38
5.1	Mass And Volume Energy Densities Of Secondary Cells	5-8
5.2	Battery Capacity For An Electric Vehicle	5-20
5.3	Battery Price With Time	5-21
5.4	Cathode Material Cost	5-24

5.5	Target For Li-Ion Rechargeable Batteries	5-26
5.6	Diverse Range Of Candidates For Cathodes	5-29
5.7	Improving Cathode Materials	5-31
5.8	Comparison Between A Conventional And All-Solid-State LiB	5-41
5.9	Comparison Between A Conventional And Metal Polysulfide LiB	5-43
5.10	EV Communications Control System Overview	5-53
5.11	Forecast of Global Sales of HEVs and EVs	5-58
5.18	Circuit Diagram For Level 3 Charger	5-71
5.19	Revenue Forecast For Semiconductors For HEV/EV Chargers	5-77
